

DAVID CEREZAL LANDA

SOFTWARE ENGINEER

ABOUT ME

- cerezal.david@gmail.com
- /davidcerezal
- Madrid

Kaixo! I'm a graduated software engineer with a master in IA. I really like creating new projects, go in-depth in the spirit of the entrepreneur and be in constant development. For now I have a lot to learn, although is a situation I like because it helps me to improve and achieve my goals. Currently I work as Back-end Developer and lead a small team at Indexa Capital, in which I learn from the best, both in development and in team management. In the spare time I have left, I keep projects of photography, writing and helping in some friends projects that allows me to try new technologies, such as React or IA. I really like projects that have a significant change in which I can involve, not just an economic purpose.

SKILLS

- **Technologies:** DDD, Symfony, PHP, Python, Django, Wordpress, React, GraphQL, Wordpress, Bootstrap, HTML5, JQuery, CSS3, Keras, Scikit-learn
